

## BeyondTrust® Privilege Express Program

The Privilege Express Program will guide you through effectively and transparently removing administrative privileges from your user population in the simplest way possible.

This personalized, professional consultation will provide key project milestones and practices to expedite the evaluation of Privilege Manager.

## Adopt Least Privilege – Quickly, Logically and Accurately

Our team of experts will develop a detailed project plan to remove admin rights in your organization in three simple phases:

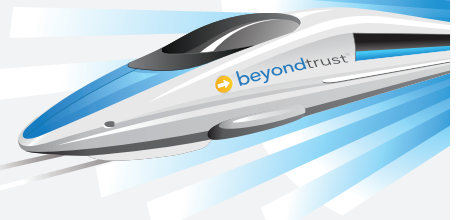

- Analyze** - 10-minute needs analysis determines project goal, timeline and required resources.
- Prepare** - Private webinar provides product demonstration and outlines implementation strategy.
- Execute** - Complete two-week proof-of-concept pilot program.

## Key Benefits of Privilege Manager

- ⇒ Secure the desktop environment
- ⇒ Run without administrator privileges
- ⇒ Eliminate attack surface for malware, spyware and root kits
- ⇒ Network Admins make security decisions, end-users do not
- ⇒ Elevate applications and processes transparently which would normally require elevated rights.

Hundreds of organizations worldwide rely on BeyondTrust® Privilege Manager to create a more secure, compliant and standard computing environment. Removing administrator rights and deploying Privilege Manager enables organizations to lower the cost to administer Windows desktops, laptops and servers. Users are still able to run custom, in-house and 3rd party developed applications that require local administrator privileges, as well as manage approved system settings that require administrative rights.
